

Axygen® Strip and Individual PCR Tubes

For standard and real-time PCR

AXYGEN®

A Corning Brand

Strip tubes are available with attached or unattached caps

Individual tubes are available with attached caps or without a cap

Axygen PCR tubes are ideal for standard and real-time PCR applications. Our strip and individual tubes feature thin walls for precise thermal transfer and tight-fitting caps for a leakproof seal. Choose from a variety of configurations and cap styles.

Strip Tubes with Attached Caps

- ▶ Designed to fit a wide variety of thermal cyclers
- ▶ Precisely aligned caps prevent evaporation and allow for easy opening and closing
- ▶ Strong plastic connections between the tubes prevent separation
- ▶ Numbered caps for easy identification
- ▶ Available with domed or flat caps

Strip Tubes with Unattached Caps

- ▶ Designed to fit a wide variety of thermal cyclers
- ▶ Even insertion cap ensures a tight fit to prevent evaporation
- ▶ Choice of 0.1 mL or 0.2 mL capacity
- ▶ Available with a domed, flat frosted, or flat clear caps for qPCR

Real-time Optimized Strip Tubes with Unattached Clear Caps

- ▶ Designed for low sample volume reactions
- ▶ Ideal for 0.1 mL thermal cyclers
- ▶ Low profile design has less dead air volume, which reduces reaction times and evaporation
- ▶ Recommended volume range of 5 μ L to 125 μ L
- ▶ Available in white or clear

Individual Tubes

- ▶ Designed to fit standard 96-well blocks
- ▶ Even insertion cap ensures a tight fit to prevent evaporation
- ▶ Available without a cap or with flat or domed individual caps

Features of all Axygen PCR Tubes

- ▶ Polypropylene
- ▶ RNase-/DNase-free
- ▶ Nonpyrogenic
- ▶ Nonsterile
- ▶ PCR inhibition-free
